DETAILED ACTION

• This action is responsive to the following communication: an Amendment filed on 6/16/05.

• Claims 1-3, 5-54 are pending in application; claim 4 has been canceled.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-3, 5-46, 49, and 52, drawn to an image forming apparatus for selecting a recording mode from a plurality of recording modes via conditionally decimating (reducing the number of recording dots through decimation) the inputted image, classified in class 358, subclass 1.13, as shown in fig. 3.

Group II, claims 47-48, 50-51, and 53-54, drawn to an image forming apparatus for selecting a recording mode from plurality of recording modes via unconditionally decimating (decimating the image in a manner such that whether a given pixel is deleted is based on the surrounding pixels that have been referred to) the inputted image, classified in class 358, subclass 2.1, as shown in fig. 4.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Frank Cire on 8/16/05 to request an oral election to the above

restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of

the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thierry L. Pham whose telephone number is (571) 272-7439.
